

Instructions for printing *Spem in Alium* enlarged A4 landscape scores

These instructions are for printing in Adobe Acrobat. If you are using a different pdf reader, you may find some of the settings are slightly different. Before printing you should download the pdf onto your computer and open in Adobe Acrobat: if you try to print direct from the window in your browser, the score may not print at full size.

Depending on your printer settings, you may need to click on 'properties' and then select A4 as your paper size.

Select 'Fit'.

You can check that the settings are correct by looking at this preview, which should show the score filling the page.

If you want to print on both sides of the paper, check 'Print on both sides of paper' and select 'Flip on short edge'.

If Orientation is on 'Auto' the printer should recognize that it needs to print landscape, but to be on the safe side select 'Landscape'.
